

How to enter the education system

The Belgian school system may seem complicated. And it kind of is. This short clip gives you a general impression of the education system in Belgium.

Adult education

You have a degree in higher education abroad. And you want to go to work or register at a Belgian university or college to complete your studies?

The NARIC (National Academic Recognition and Information Centres) provide information on studies in the countries of the European Union; they were set up by the European Commission.

The NARIC centres cooperate with the European Network of National Information Centres (ENIC), established by the Council of Europe and Unesco. There is a national NARIC centre in each country.
